

# Experience the Anchor Difference

Industry-Leading Availability & Coverage Since 1933

MAY, 2026

## GM Classic Applications **Built Then. Still Moving Today.**

Some vehicles never fade away. While the industry races toward what's next, millions of classic GM vehicles from 1945–1982 continue to earn their place on the road, in garages, at cruise nights, on job sites, and in the hands of owners who refuse to let automotive history disappear.

This month, Anchor is shining a spotlight on 12 proven GM classic applications that continue to generate steady demand decade after decade. These aren't forgotten part numbers collecting dust on a shelf. They're active, moving applications backed by a loyal customer base and consistent replacement needs. And the best part - Anchor has every one of them in stock and ready to ship.

### The Classic Market Isn't Slowing Down

Classic and vintage GM vehicles are staying on the road longer than ever before. Owners are restoring them, maintaining them, upgrading them, and driving them regularly. What was once considered "old" is now collectible, dependable, and increasingly valuable.

### Ready-to-Ship Inventory Means Ready-to-Win Sales

At Anchor, we understand that availability matters just as much as coverage. That's why we continue to support these legacy GM applications with inventory you can count on.

**MAKE SURE YOU'RE NOT MISSING OUT ON THESE SALES OPPORTUNITIES.**
